<sup>1</sup> ISO ppm is based on ISO/IEC 24734. Black and color print speeds are determined in default, letter-size, single-side mode, in accordance with ISO/IEC 24734. Black and color 2-sided print speeds are determined in letter-size, 2-sided mode, in accordance with ISO/IEC 24734. Actual print times will vary based on system configuration, software, and page complexity. See [www.epson.com/printspeed](http://www.epson.com/printspeed) for details, including complete ISO reports.

<sup>2</sup> Display permanence based on accelerated testing of prints displayed under glass in indoor display conditions; album permanence based on accelerated testing of prints in dark storage conditions. Actual print stability will vary according to media, printed image, display conditions, light intensity, temperature, humidity and atmospheric conditions. Epson does not guarantee the longevity of prints. For maximum print life, display all prints under glass or UV filter or properly store them.

<sup>3</sup> Replacement cartridge yields are based on ISO/IEC 24711 tests in default mode printing continuously. Cartridge yields vary considerably for reasons including images printed, print settings, temperature and humidity. Yields may be lower when printing infrequently or predominantly with one ink color. All ink colors are used for printing and all-in-one maintenance, and all colors have to be installed for printing. For print quality, part of the ink from the included cartridges is used for printer startup and a variable amount of ink remains in the cartridges after the "replace cartridge" signal. For details, see [www.epson.com/cartridgeinfo](http://www.epson.com/cartridgeinfo)

<sup>4</sup> Wi-Fi certified™; level of performance subject to the range of the router being used. Visit [www.wi-fi.org/files/11nbasics\\_glossary.pdf](http://www.wi-fi.org/files/11nbasics_glossary.pdf) for more information.

<sup>5</sup> Most features require an Internet connection to the printer, as well as an Internet- and/or email-enabled device. See [www.epson.com/connect](http://www.epson.com/connect) for a list of EPSON Connect enabled printers and compatible devices and apps.

<sup>6</sup> Some applications and/or functions may not be supported under Mac OS X.

<sup>7</sup> Monthly duty cycle is the highest duty a user could expect in a month, based on near-constant operation of a device of this kind. It is not recommended that the device be run at this duty. For best device performance, run the device at the recommended duty.

Fastest in its class; printing black text in default, 2-sided mode, in accordance with ISO/IEC 24734. Compared to inkjet all-in-ones priced at \$199 or less, as of December 2011, based on manufacturers' published rated ISO speeds.

40% less costs vs. laser when compared with best-selling color laser all-in-ones priced at \$450 or less, as of February 2012. Calculation based on continuous printing and prices of multi-pack ink cartridges. Actual savings will vary based on print task and use conditions.

Improved durability over the previous model. For more information, go to [www.epson.com](http://www.epson.com)

70% less power than laser when compared to best-selling, color multifunction laser printers priced at \$399 or less as of April 2012. Actual power savings will vary by product model and usage.
